

HydroTreat™ Pool & Spa Quick Start Guide:

Simple Steps for Clean, Clear Water

Step 1: Prep Your Water

-  **Remove Phosphates:** Keep below 500 ppb

Step 2: Start-Up Dose

- **Pools:** 52–104 oz per 10,000 gallons
 Alternative: Shock the pool using the recommended dosage of liquid chlorine
- **Spas:** 5.2–10.4 oz per 1,000 gallons
 Wait 1 week, then start regular maintenance
 Alternative: If opening with shock, start regular maintenance in 48 hours

Step 3: Maintenance

- **Pools:** 2 oz per 1,000 gallons weekly
 Heavy use? Increase frequency, or dose 3 oz every week.
- **Spas:** 2 oz per 100 gallons weekly
 Heavy use? Increase frequency, or dose 3 oz every week.

NOTE #1: If a significant amount of rain water enters the pool, add 1 oz per 1,000 gallons directly after the event

NOTE #2: If using an ORP meter, the target reading after application of HydroTreat should be 600+ mV

Step 4: Check Water (Optional)

-  **Chlorine:** 0.1–0.6 ppm is normal
-  **pH:** Stay between 7.2–7.6 to protect equipment

Storage Tips

- Keep out of sunlight
- Store at room temperature

Enjoy sparkling water: the simple way with HydroTreat!
